ELECTROLYSIS HAIR REMOVAL

STEREX ELECTROLYSIS IS THE ONLY FDA APPROVED METHOD OF PERMANENT HAIR REMOVAL, AS OPPOSED TO HAIR REDUCTION.

Unwanted excess hair can be extremally frustrating; Electrolysis aims at removing these unwanted hairs to enable you further freedom and confidence in your body.

Sterex Electrolysis differs from other hair removal methods in that it tackles each hair on an individual basis. Though this is a longer and more delicate method, its thoroughness is what enables permanent hair removal.

Sterex Electrolysis works by sending a current from a metal probe down each individual hair, a combination of this electrical current and a chemical reaction kills it at its root, thereby stopping any regrowth.
